Dear Patient,

I am sorry to have to inform you the following:

It is not our capacity to answer questions you have regarding your insurance company.

The receptionist will help you find out the coverage for any visits costing more than \$200.00 e.g. surgery and OB care that are billed from this office.

We are unable to help you with knowledge, if the following are covered by your insurance company such as blood work, pap smear & radiology.

We advise you check with your insurance company or book to decide which labs or radiology places are covered. I usually order tests that are needed. Call your insurance to make sure they are covered. I have read and I do understand my responsibility.

I have read the above statement and understand my responsibility,

Thank you for your cooperation.

Wafika M. Fahmy, M.D.

The following laboratory will be covered by my insurance.

Name of Lab: MDL or Pathology Associates

If I do not inform you in 3 days, please send my specimen to the Clinically appropriate lab.

Please do not send my specimen.
